DETAILED ACTION

Specification

1. A substitute specification excluding the claims is required pursuant to 37 CFR 1.125(a) because layout for the specification is inappropriate.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

Art Unit: 2881

(e) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(f) BRIEF SUMMARY OF THE INVENTION.

(g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(h) DETAILED DESCRIPTION OF THE INVENTION.

(i) CLAIM OR CLAIMS (commencing on a separate sheet).

(j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

2. The Applicant canceled claims 1-75 and added new claims 76-147 as per his

"Preliminary Amendment" received November 8, 2000.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 76-147 are rejected under 35 U.S.C. 101 because the claimed invention is inoperative and therefore lacks utility. The invention is a newly postulated theory that has no established scientific basis, nor is it supported by any experimental findings. The incredible assertion as to this third long range force in Nature, in addition to electromagnetism and gravitation, having the strength of about six times that of electromagnetism is not based on any presently known laws of physics. The following expressions "order charge", "source of order charge", "order charge separator", and "order charge collection" which are used in claim 1 have no clear defined meaning. In consequence, a person skilled in the art is unable to determine the

Art Unit: 2881

device features associated to said expressions and to determine if a given apparatus falls or not within the scope of the claims. An evaluation of the novelty, inventiveness and industrial applicability of the claimed subject-matter is not possible, as the precise scope of the claims cannot be determined for the above mentioned reasons.

The Applicant states the following with respect to his theory in his specification:

Page 2, line 6: "To my knowledge, few people or nobody expect this force to exist."

Page 2, lines 17-21: "Present scientific technology cannot detect the order charge, nor can it detect orderons in the environment. Therefore, science is completely oblivious to the effects of this force. Nevertheless, its effects exist and sometimes these show up in scientific experiments, where they tend to remain as unexplained phenomena which are ignored."

Page 3, lines 8-9: "The view that we have then, is that there is a third long-range force which currently cannot be detected directly and so is unknown to science."

Page 3, lines 23-24: "The information presented here concerning the Ordering Force simply has to be taken at face value."

Claim Rejections - 35 USC § 112

5. Claims 76-147 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a credible asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.
